ADE BRANCH MEMORANDUM NO. 508.13
SUPPLEMENT 1

To : All ADE Branch Stations
From : F. J. Mulhern, Acting Chief of Branch
Subject: Long Distance Telephone Calls

On numerous occasions when attempts have been made to contact veterinarians in charge or their assistants by telephone, it has been learned that both are in the field and cannot be contacted until the following day.

In an emergency, the time involved in locating these field officials can be very important. Itineraries should be planned so that when the veterinarian in charge is absent from the office, his assistant will be available. In cases where this is not possible, a policy should be established whereby contact can be made with one or the other within an hour after the station has been called.

F. J. Mulhern
